### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." **ICPSR PROCESSING NOTE FOR # 26149**  
*American Time Use Survey (ATUS), 2008*  
*Respondent and Activity Summary File*

- 1) **Merged files:** Part 1 contains the original Respondent and Activity Summary files merged into one data file.
- 2) **Sequential record identifier:** ICPSR created a unique sequential record identifier variable named **CASEID** for use with online analysis.
- 3) **Variable labels added:** Variable labels were added to the activity code variables according to the 6 digit code in their variable name, which corresponded to the activity descriptions listed in the 2008 ATUS Activity Lexicon.
- 4) **Value labels added:** Value labels for unknown codes were added in the variable **TURETOT** and value labels were added to variables **TEIO1ICD**, **TEIO1OCD**, and **TRDTIND1** according to industry and occupation codes listed in the 2008 ATUS Data Dictionary.
- 5) **Data format:** The formats of the variables **TUBWGT** and **TUFINLWGT** were adjusted to fit the width of the values present in these variables, and the following variables were converted from character to numeric: **TUCASEID**, **TEHRUSLT**, **TEHRUSL1**, and **TEHRUSL2**.

## Data Completeness Report

Notes: (1) Variables are individually listed only if they have greater than 5% missing data. These variables are listed under the appropriate percentage category in the order in which they appear in the data file. (2) The Data Completeness Report only captures information about system missing or other values that are declared missing. Codes that have a label implying that they are missing but that are not declared missing values are not reflected in this report. Data users should consult the codebook for more specific information about missing values. (3) Some variables that have 100% missing data may have been blanked by ICPSR to protect respondent confidentiality. Data users should consult the codebook for more specific information about blanked variables. (4) Data do not contain skip patterns or skip patterns are not reflected in the data as coded.

**Table 1: Distribution of Variables by Percentage of Missing Values--Respondent and Activity Summary File**

<b>Variable Name and Label (Total Cases = 12723 )</b>		<b>Percent of Cases with Missing Values</b>

## LINKING THE ATUS DATA FILES:

---

Each of the ATUS microdata files contains useful information, but to produce most estimates, the files must be linked. All of the microdata files contain the variable TUCASEID, which is the ATUS identification number. TUACTIONITY\_N (the activity line number) and TULINENO (the person line number) are two additional linking variables that can be used in conjunction with TUCASEID.

### 1. BASIC ATUS DATA FILES

<b>File</b>	<b>Linking Variables</b>

## Frequently Used ATUS Variables

The ATUS files have many variables and users may sometimes have difficulty determining which variables to use. This document attempts to identify those that are most frequently used. All variables are defined in the ATUS Data Dictionaries, available at: [www.bls.gov/tus/dictionaries.htm](http://www.bls.gov/tus/dictionaries.htm).

(Analysts combining only 2003, 2004, and 2005 data may use TU04FWGT for 2003 data and TUFINLWGT for 2004 and 2005 data if they prefer.)

June 2009

The American Time Use Survey (ATUS) is sponsored by the Bureau of Labor Statistics and conducted by the U.S. Census Bureau.

## Changes between 2003 - 2008 ATUS Data Files

Changes to survey design, sampling, weighting, variable definitions, imputation, and other methodology can have serious implications for interpretation of results. The purpose of this document is to detail any such changes made to ATUS survey methods and data files from 2003 to 2008. Only years for which changes were made are listed.

### 1. Sample Reduction

**2004:** The monthly sample was reduced by 35 percent beginning with the sample introduced in December 2003. Because of the reduction, there were fewer completed interviews in the years after 2003 than there were in 2003. For example, there were 13,973 completed interviews in 2004 compared to 20,720 interviews in 2003. Since the sample reduction was introduced in December 2003, the first few months in 2004 have a greater number of completed interviews than later months.

**2005:** There was no sample reduction between 2004 and 2005, but 2004 had a greater number of completed interviews in the first few months of 2004 than in 2005 because of the sample reduction introduced in December 2003. The 2005 completed interviews are more evenly distributed across months.

For more information, see the ATUS User's Guide ([www.bls.gov/tus/atususersguide.pdf](http://www.bls.gov/tus/atususersguide.pdf)).

### 2. Questionnaire Changes

**2004:** Minor changes to survey questions were introduced in ATUS in October 2003. More detailed secondary childcare questions were asked about own household children, own nonhousehold children, and non-own household children. Also, a new question about eating was introduced. Respondents who did not report eating or drinking on their diary day are asked, "Did you do any eating or drinking yesterday as your main activity?"

**2006:** A five-minute Eating & Health (EH) module was introduced in January 2006. This module included questions related to eating, meal preparation, and health, all of which were asked after completion of the ATUS questions.

For more information, see the ATUS Questionnaire ([www.bls.gov/tus/tuquestionnaire.pdf](http://www.bls.gov/tus/tuquestionnaire.pdf)) and the ATUS Eating & Health Module Questionnaire ([www.bls.gov/tus/ehmquestionnaire.pdf](http://www.bls.gov/tus/ehmquestionnaire.pdf)).

### 3. Weighting Changes

There were no changes in the method used to generate statistical weights (the variable TUFINLWGT) on the ATUS data files from 2006 to 2008. However, the method used to generate the weighting variable TUFINLWGT on the ATUS files changed each year from 2003 to 2006. Thus, researchers who create multi-year data sets should not use the weighting variable TUFINLWGT for all years.

Users who combine multiple years of ATUS data must use weights that were generated using comparable methods. TU06FWGT is a weighting variable that was generated using the 2006 weighting method. Users who combine ATUS data for the years 2003 to 2008 should use the variable TU06FWGT to weight the 2003 to 2005 data and the variable TUFINLWGT to weight the 2006 through 2008 data.

The variables TU04FWGT (on the 2003 files) and TUFINLWGT on the 2004 and 2005 files also were generated using comparable weighting methods. Researchers who combine the 2003 to 2005 data files can use this combination of weighting variables or the variable TU06FWGT for all years. (Note that while the method used to generate TUFINLWGT changed from 2004 to 2005, the difference in methods is slight and has little impact on estimates.)

For more information, see the ATUS User's Guide ([www.bls.gov/tus/atususersguide.pdf](http://www.bls.gov/tus/atususersguide.pdf)).

#### 4. Public Use ATUS Files

Public use ATUS files are released every year. The following table lists the availability of files by year.

#### 5. ATUS Coding Lexicon Changes

**2004:** There are minor differences between the 2003 and 2004 Coding Lexicons. Some activity codes were added and others deleted.

**2005:** The first-tier code for travel was changed from TUTIER1CODE = 17 to TUTIER1CODE = 18. There were also some minor differences between 2004 and 2005 Coding Lexicons.

**2006:** There are minor differences between the 2005 and 2006 Coding Lexicons.

**2007:** There are minor differences between the 2006 and 2007 Coding Lexicons.

**2008:** There are minor differences between the 2007 and 2008 Coding Lexicons.

For more information, see [www.bls.gov/tus/lexicons.htm](http://www.bls.gov/tus/lexicons.htm).

## **6. Linking ATUS to CPS**

**2004:** Because of May 2004 changes to the CPS file format, the method used to link ATUS files to CPS files is different for those cases whose final CPS interview occurred after May 2004. For additional details, see the 2004 ATUS-CPS data dictionary ([www.bls.gov/tus/atuscpscodebk04.pdf](http://www.bls.gov/tus/atuscpscodebk04.pdf)).

Please see Appendix K of the ATUS User's Guide for more detailed information about how to link CPS files to ATUS files ([www.bls.gov/tus/atususersguide.pdf](http://www.bls.gov/tus/atususersguide.pdf)).

## **7. Case and Call Outcome Codes**

**2005:** In April 2005, ATUS migrated to the Census Bureau's new standardized computer system for managing telephone interviews. The outcome codes and the outcome assignment methodology are slightly different between the old and new systems. Thus, 2003 and 2004 case and call outcome codes are different from those used in 2005 to 2008.

For more information, see the 2005 Survey Methodology data dictionary: [www.bls.gov/tus/atussmcodebk05.pdf](http://www.bls.gov/tus/atussmcodebk05.pdf).
